## Miracle of the Quran - Dead Body of Pharaoh

**In this world We made a curse to follow them: and on the Day of Judgment they will be among the loathed (and despised). (Quran 28: 36-42)**

Here's the story of France with Pharaoh Ramses. When Francisco Mitre became the president of France in 1981, France requested from the Egyptian government to host the mummy of Pharaoh. For the purpose of running laboratory and archeological examinations on the mummy of the most notorious dictator ever lived on earth. Upon arrival, very royal attendants were there including the French president himself and all ministers who bowed in honor for the mummy.

When the ceremony ended, the mummy was carried to a specially-designed section at the Archeology Centre of France where it started to be tested by the greatest French archeological and anatomical scientists in order to discover more about such a great mummy. The scientists were headed by Professor Maurice Bucaille. Scientists were trying to restore the mummy while Professor Maurice was mainly concerned with how did this mummy die!

The final report of the scientists was released late at night which states that the remaining salt in the mummy is overt evidence that it was drawn from the sea, and the body was rescued very shortly where it was immediately embalmed to be saved.

An amazing thing was still confusing Professor Maurice is that how could this body possibly be safer than any other mummy despite being taken out of the sea up until this time. Professor Maurice was writing his final report on what he thought would be a new discovery about saving Pharaoh's body immediately after his death and embalming it. And there, someone whispered to him that Muslims claim to know something about the drowning of this mummy.

Yet the Professor firmly denied such thing saying that it's impossible to discover this without the development of science and without using his high-tech and complicated laboratories and computers. To his surprise, he was told that Muslims believe in a book called 'Quran' and this Quran narrates the story of Pharaoh's drowning and ensures the safety of his body after his death as to be a Sign to mankind. The Professor couldn't believe his own ears and started to wonder:

**How can a book existed 1400 years ago speak about the mummy that was only found 200 years ago, in 1898?**

**How can that be possible while the ancient Egyptian heritage was discovered only a few decades ago and no one knew about it before?**

The Professor sat down pondering on what he was told about the book of Muslims while his Holy Book narrates only the drowning of Pharaoh without saying anything about his body. **Is it possible that this mummy in front of me is the one who was chasing Moses? Is it possible that Muhammad knew this 1400 years ago?**

The Professor couldn't sleep that night till they brought him the Old Testament where he read: **'the sea drowned Pharaoh and his army, no one else was left alive'** He was surprised that the Holy Book didn't mention about the destiny of the body and that it will be saved \*

When the scientists were done with the mummy, France returned it to Egypt, but Professor Maurice couldn't rest for a moment since he was told that Muslims know about the safety of the body. So, he decided to travel and meet anatomy Muslim scientists and there he spoke about his discovery of the safety of the mummy after its death in the sea and so on. \*

One of the Muslim scientists stood up and simply opened the Quran and pointed to the Professor at one verse:

**'This day shall We save you in your body, that you may be a Sign to those who come after you! But verily, many among mankind are neglectful of Our Signs'** (Quran 10:92)\*

The Professor was struck when he read that and immediately stood in front of the crowd and said loudly: 'I believe in Islam, I believe in Quran'. Then he went back to France with a different face he traveled with. In France, he dedicated 10 years investigating the scientific discoveries and comparing them with the Quran and trying to come up with one scientific contradiction with the Quran. Finally he quoted one verse from the Quran to be his conclusion:

**'No falsehood can approach it (this book) from before or behind it: it is sent down by One Full of Wisdom, Worthy of all praise'** (Quran 41:42)

As a result of all years of his research, Professor Maurice wrote a book that shook all Europe, especially the scientists there. 'Quran, Torah, Bible and Science: A Study of the Holy Books in the Light of Modern Science'

All copies were sold out at a very short time. I personally visited the Cairo Museum where the mummy is preserved and there you get astonished at the scenery of thousands of people from all over the world visiting the place everyday, unfortunately, many of the tourists there would think: 'Wow, look at that! Amazing!! So nice to see people of all times!! Without realizing the intended lessons that Allah has kept this body a Sign to all mankind of anyone who denies Allah and His messengers.
